AI VidyaSetu 1.0

{ *Code for New Bharat* }

NATIONAL'S GUIDELINE

Introduction

AI VidyaSetu 1.0 is a national-level initiative designed to empower school students with practical knowledge and real-world skills in Artificial Intelligence, Coding, and Computational Thinking. Aligned with the vision of Viksit Bharat 2047 and implemented in accordance with the National Education Policy (NEP), the program aims to build a strong foundation in future technologies by encouraging students to learn, create, and innovate through hands-on, experiential challenges.

The National Round represents the culmination of this journey, bringing together the most talented student teams from across the country. After progressing through multiple stages—including foundational and advanced bootcamps, preliminary assessments, regional coding challenges, and zonal-level competitions—the top 30 teams from each category (Junior and Senior) have qualified to compete at the national level.

Prerequisites for Participation

All participating teams must ensure the following prerequisites are fulfilled before attending the National Round of AI VidyaSetu. These requirements will help in smooth verification, participation, and competition flow:

1. Team & Identity Requirements

- a. Each Team must download the AI VidyaSetu ID card on the AI VidyaSetu 1.0 Team Portal no later than **6th January 2026**.
- b. All team members and mentors are required to download and print the AI VidyaSetu 1.0 ID Card and carry it to the event for verification.
- c. This AI VidyaSetu 1.0 ID card will be used for entry and identity verification at the National venue.
- d. Teams without the AI VidyaSetu 1.0 ID will not be allowed to participate.

2. Laptop & Equipment Requirements

- a. Each team should bring a 2-3 laptops for the National event.
- b. Laptops must be:
 - i. Fully charged before the event.
 - ii. In working condition with no hardware faults
 - iii. Compatible with the required coding tools/platform
 - iv. Teams must bring their laptop chargers (organizers will not provide chargers/adapters).
- c. Each team must bring one USB drive (pen drive) with a minimum of 32GB storage capacity.
 - i. This USB drive will be used for storing emergency backups of code or presentation files (if instructed).
 - ii. The USB must be virus-free and should not contain any pre-written code or external programming files that violate competition rules.

Participants may use a coding platform(eg: Visual Basics , etc) of their choice, provided the software/IDE is already pre-installed on their laptop before event or online programming platforms(only Google Collab & Jupyter Notebook allowed).

Event Schedule and Format

Day	Date	Activity	Details / Requirements	Timing
-	5/1/2026	Knowledge Session	Industry–Academia Session	9:00 am – 12:00 pm
Day 0	7/1/2026	Registration Desk & Help Desk	Verification for residing teams at school using AI Vidyasetu ID card	6:30 pm – 7:30 pm
Day 1	8/1/2026	Registration Desk & Help Desk	Verification for remaining teams using AI Vidyasetu ID card	8:00 am -8:20 am
Day 1	8/1/2026	Inaugural	Opening ceremony marking the commencement of two days event	8:20 am – 9:00 pm
Day 1	8/1/2026	Coding Round	8-hour coding challenge based on the assigned problem statement.	9:00 pm – 5:00 pm
Day 2	9/1/2026	Presentations	Each team presents as per allotted time slot	9:00 am – 12:00 pm
Day 2	9/1/2026	Award Ceremony	Recognition and felicitation of top-performing teams at the conclusion of the National Round.	12:30 pm- 2:30 pm

Format Structure

• Knowledge Session

Date: 05 January 2026

Time: 09:00 AM – 12:00 PM

A national-level knowledge session conducted by IIT faculty and industry experts to guide participants on emerging technologies, problem-solving approaches, system design, prototyping, teamwork, and building scalable solutions aligned with national priorities such as Viksit Bharat 2047 and NEP 2020.

• Day 1 – Coding Problem-Solving Round

- All registered teams (Junior and Senior categories) will participate.
- Teams will receive problem statements through the AI VidyaSetu 1.0 Team portal and must complete the challenge within the allotted time.
- The coding round will be conducted in a Invigilated and monitored environment.
- Evaluation will be based on:
 - Logic & problem understanding
 - Code efficiency and optimization
 - Output correctness
 - Code readability and structure
- **Code/Project submission & 5 min video** (upon the execution of code & output) submission will be done only on the official AI VidyaSetu 1.0 website through the team portal .

- Google videos (<https://docs.google.com/videos/d/1qNVDcKAE7sGH9KsDWrKHliUncFtnNFOG0wolACkq07I/eid?scene=id.p#scene=id.p>) is recommended to record the output of the solution.
- Teams must ensure the code is saved and submitted before the deadline.
- If a team is unable to upload the Code/Project on the AI VidyaSetu 1.0 Team Portal before the deadline due to genuine technical issues, they will be permitted to submit the code via USB.
- Late submissions will not be accepted under any circumstances.
- **Day 2 – Code/Project Presentation Round**
 - Top 15 teams from each category (Junior & Senior) based on Day 1 performance will qualify.
 - Each shortlisted team will present and explain their code and solution approach.
 - Time allocation:
 - 7 minutes presentation and demonstration of solution.
 - 5 minutes Q&A session
- Presentation file submission must be done on the AI VidyaSetu 1.0 website through the team portal.
- Teams must upload their final presentation before the before the 7:00 am on Day 2.
- Only one file submission will be allowed per team — no replacement beyond the deadline
- The presentation should cover:
 - 5-minute video demonstrating the execution of their code and the final output.
 - No more than 10 slides

Qualification and Advancement Rules

Stage	Selection Criteria	Number of Teams Selected
After Day 1	Coding Round Score	Top 12 per category
After Day 2	Presentation Score	Winners

Disclaimer: Evaluation will be done by appointed judges and organizers decisions will be final and non-negotiable.

After the top 12 teams per category (Junior & Senior) are shortlisted, **coding marks will not be counted** toward the presentation score or the final selection for Nationals.

Platform & Submission Preparedness

- Teams must be comfortable using the AI VidyaSetu Team Portal.
- Both Code submission (Day 1) and Presentation submission (Day 2) will be done only through this portal.
- Teams should ensure:
 - Working browser on laptops
 - Presentation file is prepared in PPT format
 - File size can be max 100 mb.
 - Only the final version of the presentation is submitted before the deadline

General Participation Rules

- Participants must reach the venue at the reporting time mentioned in the schedule.
- Students must carry:
 - AI VidyaSetu 1.0 ID card
 - Personal Laptops(2-3 per team)
 - 1 USB per Team
- No replacement or addition of team members will be permitted.
- Talking, leaving seats without permission or causing disruption during the coding session is prohibited.
- Participants are responsible for saving and submitting code on time; organizers will not be accountable for unfinished or unsaved submissions.
- Any medical or emergency situation must be immediately reported to the volunteers/organizing desk.

Flow of the Event

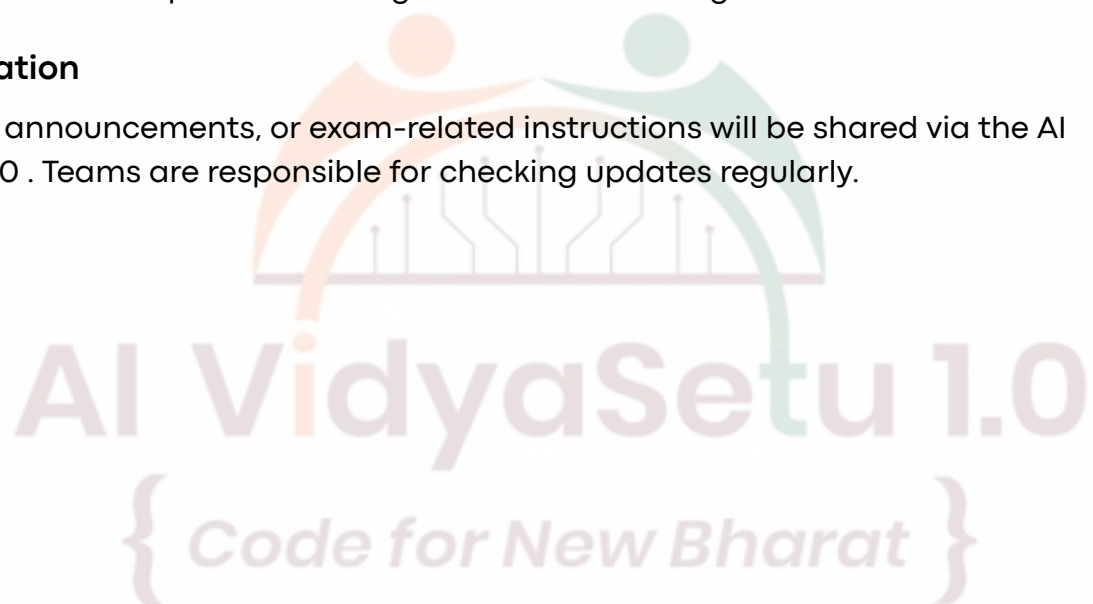

Misconduct, Violation & Disqualification Policy

To maintain fairness, the following actions will result in immediate disqualification and cancellation of participation:

- Copying or importing code from external sources during the coding round
- Receiving help/assistance from mentor, teacher, guardian or any non-participant
- Communication or collaboration between two different teams
- Attempting to swap or replace a team member
- Logging in or coding on behalf of another team
- Tampering with event systems, software, laptops or competition tools
- Any intentional attempt to disturb the event environment
- Arguing with judges, volunteers or organizers in an inappropriate manner
- Any other unethical practices that grant unfair advantage

Communication

All updates, announcements, or exam-related instructions will be shared via the Ai VidyaSetu 1.0 . Teams are responsible for checking updates regularly.

Prerequisites for National Round

- Problem statements for the National Round will focus on community building and include the following:
 - Agriculture
 - Smart City
 - Healthcare
 - Waste Management
- Problem Format:
 - Problem statements will include a few predefined features
 - Teams are expected to innovate and add non-defined features based on research and creativity
- Research & Data Orientation:
 - Solutions should be research-driven or data-analysis-based, using real-world data wherever applicable.
- Prototype Readiness:
 - Teams should be prepared to design and demonstrate a working prototype during the National Round.
